

REMARKS

Claims 1-6, 25 and 26 have been canceled. Claim 10 has been amended. Claims 9-15 are pending.

Allowable Subject Matter

The Applicants thank the Examiner for indicating that claims 9-15 include allowable subject matter.

Drawings

The objections were objected to in the Office Action for not showing the voltage source integrated into the CMOS circuit. The Applicants respectfully disagree.

An adjustable voltage source is recited in claims 9 and 10. Claim 10 recites “an adjustable voltage source coupled to the radiation sensor.” Claim 9 depends from claim, and recites, “the adjustable voltage source is integrated into the radiation-measuring circuit.” The adjustable voltage source is shown in FIG. 2. In referring to FIG. 2, the specification describes the adjustable voltage source as either external or integrated into a radiation-sensing circuit. Page 6, lines 10-16.

The Applicant respectfully requests withdrawal of the objection to the drawings because FIG. 2 is intended to cover situations in which the adjustable voltage source is either external or integrated into the radiation-measuring circuit.

Claim Objections

Claim 10 has been amended to remedy the lack of antecedent basis noted in the Office Action. The objections to claims 1, 4, 5, 25 and 26 are moot because those claims have been canceled.

Attorney's Docket No.: 10559-678001 / P13211

Claim Rejections – 35 U.S.C. 102 and 35 U.S.C. 103

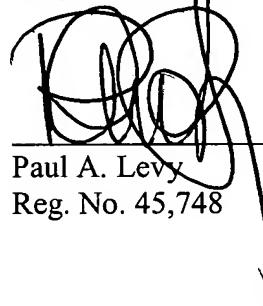

The rejections of claims 1-6, 25 and 26 are moot because those claims have been canceled.

Conclusion

The Applicant submits that the application is in condition for allowance.

The Applicant does not believe that any fee is due at this time. However, please apply any other charges or credits to deposit account 06-1050.

Respectfully submitted,
